"Developing the people who deliver outdoor education in Queensland"

Risk Management and Outdoor Education: From Theory to Practice

Preston Cline, founding President of Adventure Management (USA) presents a day for the OEAQ, it's members and friends on Risk in the Outdoors.

This is a workshop for both Outdoor Leaders and Coordinators.

For Outdoor Leaders this training is designed to help participants identify sustainable risk management habits both in themselves and in their co-instructors. In this way, instead of reacting to crises as they appear, they can become self-correcting teams that trap, mitigate and avoid errors before they escalate into crisis.

For Outdoor Program Coordinators it is designed to help with creation of training and management processes that enable staff to trap, avoid or mitigate the errors that occur during program.

Preston Cline is a key note speaker at the **National Outdoor Education Risk Management Conference Ballarat September 2007.**

This is a great opportunity to learn from this highly regarded international expert with a reputation for his engaging presentations.

"Adventure Management is the foremost risk management training and consulting firm in the world."

Dr Pete Allison
University of
Edinburgh, Scotland

"...Adventure Management is one of the leading Risk Management firms in the world..."
